PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate with two internships and a strong portfolio of full-stack, mobile, and AI/ML projects. Experienced across React/Next.js, React Native, Node.js, Spring Boot, and computer vision model deployment. Comfortable owning a feature end-to-end — from database schema design to UI implementation to production debugging — and building genuinely production-grade personal projects rather than tutorials.

EXPERIENCE

Mobile App Developer Intern **Seria Applied Research Pvt Ltd · Bengaluru, IN** *Jul 2026 – Oct 2026*

- Second internship at Seria as a Mobile App Developer, reporting to the engineering team on-site, building and supporting mobile application features

Machine Learning Engineer Intern **Zemicon Electronics · Bengaluru, IN** *2025 – Present*

- Optimized and deployed computer vision models (YOLOv8) through quantization and ONNX conversion for production inference
- Debugged model pipeline issues end-to-end and worked independently in a deadline-driven engineering environment

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, Go, SQL, C#

Frontend / Mobile: React, Next.js, React Native (Expo), Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, REST APIs, GraphQL

Database: PostgreSQL (Supabase, RLS), Prisma ORM, SQLite, MySQL

AI / ML: LangChain, ChromaDB, Gemini API, TensorFlow (BiLSTM), YOLOv8, ONNX

Tools: Git/GitHub, Docker, Postman, Web Audio API, VS Code

PROJECTS

DEVILSTONE – Interactive Fretboard Console & Learning Manager | *Next.js 16 · TypeScript · Prisma · SQLite*

- Built a multi-instrument (guitar, 4-str/5-str bass) fretboard console with register-focused practice modes and a one-click scale layout image exporter
- Engineered a drift-free Web Audio API metronome scheduler (subdivisions, swing, countdown alerts) and a 20-session Academy curriculum with Prisma-backed progress tracking

Pharmacy Management System – Microservices Backend | *Spring Boot · Java · JWT · Docker*

- Architected a 7-service microservices backend with JWT-based authentication and inter-service REST communication

Intelligent Substation Maintenance Chatbot | *Python · LangChain · ChromaDB · Gemini API*

- Built a RAG pipeline achieving 90% retrieval accuracy over technical maintenance documentation, integrating LLM APIs into a working application end-to-end
- Designed the prompt orchestration and vector retrieval layer grounding model responses in domain-specific source documents

Deep Learning Sentiment Classifier API | *TensorFlow · BiLSTM · FastAPI · NLTK*

- Trained a BiLSTM model achieving 82.2% accuracy on IMDB sentiment data; deployed as a production FastAPI REST endpoint with an NLTK preprocessing pipeline

EDUCATION

Presidency University, Bengaluru — B.Tech, Computer Science & Engineering

Expected Aug 2026

CERTIFICATIONS & ACHIEVEMENTS

- **NLP & Transformers Specialization** — Hugging Face, 2025
- **Introduction to DevOps** — IBM & Coursera, 2024
- **National Level Technical Fest** — Project Showcase, Dec 2024
